Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: _____.

DETAILED ACTION

1. This communication is responsive to your amendment and election filed 8/14/06. Original claims 1-14 and new claim 15 are currently pending in this application.

Election/Restrictions

2. Applicant's election with traverse of Group III, claims 9-14 in the reply filed on 8/14/06 is acknowledged. The traversal is on the ground(s) that newly filed claim 15 is a linking claim. This is not found persuasive because, claim 15 is not in fact a linking claim, claims to the non-elected inventions do not require the limitations of claim 15 alleged to be a linking claim. In fact the opposite is true, claim 15 requires all the limitations of the non-elected inventions (see MPEP 809). Thus, the relationship between newly submitted claim 15 and the originally filed claims is that of a combination-subcombination where clearly the subcombinations have separate utility.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 1-8 and 15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 8/14/06.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. An action on the merits of claims 8-14 follows below:

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Ehman et al. P.N. 5,825,186 (Ehman).

Ehman discloses a method for producing stiffness weighted Magnetic Resonance images. Applicant's attention is directed to Fig. 3 and the first two complete paragraphs of col. 10. To encode motion in addition to position, a component "321" is added to the phase encoding gradients 304 and 311. Note that this gradient, component, which is a gradient motion-sensitizing component, can also be added to the slice select gradient. See "312". Ehman meets all limitations of the claims at issue in their present form.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Muthupillai et al., Opsahl et al., and Sinkus et al., all disclose MRI elastography imaging methods. Note the abstract of each disclosure. Note in particular the description of gradients G1 and G2 in Sinkus et al.
